Subject: **Georgetown Steam Plant: Submittal of Draft Low-Lying Area Interim Action Work Plan and Data Reports**

Dear Mr. Edens:

I am pleased to submit the draft Low-Lying Area Interim Action Work Plan for Ecology review. Seattle City Light has prepared this work plan in response to your June 18, 2010 letter requiring the City to submit a revised schedule and plans for soil removal activities at this site. The work plan has been developed according to the approach outlined in our August 4, 2010 Addendum to the Draft Georgetown Steam Plant Site Characterization Work Plan.

Included with this submittal are the draft Low-Lying Area Data Report and June 2010 Soil Boring and Groundwater Monitoring Report. These reports summarize preliminary results of additional site characterization activities which support the development of interim action plans for the Low-Lying Area and further characterization of the overall Georgetown Steam Plant site.

I look forward to receiving comments on the data reports and work plan. We are available to discuss these reports, as needed, to facilitate your review.

Sincerely,

A handwritten signature in cursive script, reading "Jennie Goldberg".
